Default Diagram

Change Update Rate
Type in the number of seconds you would like between page updates and hit <RETURN> 10

Some features to implement:

Auto-detection: Excel could automatically add a worksheet (a "tab" below) when it detects a new device on the network.

Complex Aggregation: Because it is Excel, you can do anything you want, easily.

Logging: You could write simple scripts to log the values on the left to an Access DE

Animation: Charts, warnings, etc

Onboard logs could be displayed easily

Default diagrams: we just need to create an excel template for each device

GRAPHICAL VOLTAGES

Sum of Currents:

643.31

Formula-based Setpoint:

OVER 550 Volts
